### **Peatlands Partnership announces that Flow Country Observatory to be built by local contractor**

The Peatlands Partnership has announced that Thurso-based O'Brien Construction has won the contract to build the Partnership's new Observatory, designed to provide elevated views across a natural area of bog pools near Forsinard in the Flow Country.

Project manager Caroline Eccles said, "The Observatory and the visitor experience it will provide is a key part of the Flows to the Future project. This is a demanding commission and I am delighted to say that a local company has won the contract."

Donald Chambers of O'Brien Construction, said, "I am extremely pleased that we, a local firm, have won this contract and have the opportunity to make a contribution to this important project and the benefits it will bring to the area. Although only a small structure, the high level of environmental care being required and the location makes it quite an engineering challenge. We look forward to meeting the challenge and I am very confident that we will do the area proud."

Ms Eccles said, "The observatory will be built on the existing Dubh Lochan Trail at a location currently used as an outdoor classroom. Hundreds of schoolchildren and thousands of visitors use the trail every year and there has long been a demand for a

structure that can give elevated views of the intricate shapes of the bog pools, and provide a degree of shelter.

“As the project develops, with a redeveloped visitor centre at Forsinard, the creation of a new field centre and developments elsewhere, we will see more and more visitors coming to this iconic part of north Scotland. This is great news for local tourism businesses and a real boost for the local economy.”

John Henderson, the chairman of the Peatlands Partnership added, “It has taken a lot of hard work to get this far and it would not have been possible without the active help of our many partners and local supporters. Building a sustainable future for this area is one of the goals of the Partnership. Businesses and our young people will be major beneficiaries of these investments in our infrastructure”.

*The Flows to the Future project gratefully acknowledges funding support from the Heritage Lottery Fund and the European Regional Development Fund.*
